Wall Hook

Step 01

INSTALL WALL HOOK

Wall anchors and fasteners are included for installation. Please consult your local hardware professional to determine the hardware best suited for your wall type.

Position the hook in the desired location and orientation, then mark the mounting locations.

The small and large sizes of the wall hook come with different wall anchor and screw sizes. Carefully follow instructions below to ensure proper installation.

For **SMALL** wall hooks:

If the mounting location is not positioned on a stud, drill a **3/16"** hole in the marked location and insert wall anchor. If the mounting location is located on a stud, this step of installing an anchor may be skipped. Instead, drill a **3/32"** pilot hole in the marked position.

OR

For **LARGE** wall hooks:

If the mounting location is not positioned on a stud, drill a **7/32"** hole in the marked location and insert wall anchor. If the mounting location is located on a stud, this step of installing an anchor may be skipped. Instead, drill a **7/64"** pilot hole in the marked position.

Attach wall hook using provided wall screw to complete installation.

Additional Information

NOTE

15 lbs maximum weight capacity on hook.

CLEAN

Clean with a slightly damp, soft cloth. To remove dirt and fingerprints, use a quality cleaner formulated for painted metal furniture. Wipe completely dry with a soft cloth.
